

## **Q-estival**

**Thursday 12<sup>th</sup> September**

Within our research lab of Policing in Practice we welcome local artist Catherine Cartwright who will deliver this exciting session.

### **“Animated Faces”**

Explore facial recognition technologies through this creative workshop that combines simple printmaking and animation.

We'll make stamps to create an animated face, which we'll turn into a gif or a flick book.

No experience necessary, come and be playfully inky.
